New for 2014

Honeyberry, Borealis (*Lonicera caerulea* var. *edulis* 'Borealis') Small shrub 3-8' tall. Tolerates a wide variety of soil types and pH as high as 8. Produces an edible blue berry with a thinner skin than Tundra, suitable for U-pick operations. First fruit to ripen in the spring. Need Cinderella as a pollinator.

Honeyberry, Cinderella (*Lonicera caerulea* var. *edulis* 'Cinderella') Small shrub 3-8' tall. Tolerates a wide variety of soil types and pH as high as 8. Produces an edible blue berry. First fruit to ripen in the spring. This

Honeyberry, Tundra (*Lonicera caerulea* var. *edulis* 'Tundra') Small shrub 3-8' tall. Tolerates a wide variety of soil types and pH as high as 8. Produces an edible blue berry that could be mechanically harvested. First fruit to ripen in the spring. Need Cinderella as a pollinator.

Plum, Black Ice The large, round, fruited dessert plums are blue-black with very sweet, juicy, yellow flesh. Fruit ripens in early August, about 2-4 weeks earlier than other plums grown in the Midwest. Naturally dwarf trees require a pollinator like Toka Photo credit: Brian Smith, UWRF

Plum, 'Pembina' (*P. salicina* x *P. nigra*) 'Pembina' is a 1923 release from Brookings, SD. It is a good dessert plum with yellow, sweet, juicy flesh. Large size, red, pointed fruit. Blooms early May and ripens late August. Requires a pollinator. Grows 10-15' tall. Photo Credit: Hardy Fruit Trees Nursery, Quebec, Canada.

Crabapple 'Profusion' A fast growing, upright, small rounded crab, 'Profusion' is noted for its abundance of deep red buds that open to purple-red single flowers with pink centers, then fade to lavender. The foliage emerges purple, then fades to bronze-green. The persistent 1/2" fruit is maroon-red in color. Good disease resistance. Grows 15-20' tall with 30' spread. Photo Credit: Missouri Botanical Gardens

Crabapple 'Donald Wyman' (*Malus 'Donald Wyman'*) Donald Wyman is a highly rated crabapple with disease resistant leaves and a nice rounded shape, growing as wide as it is tall. Summer foliage is glossy, dark green. Has pink buds opening to single 1-1/2" white flowers. Abundant and showy 3/8" red fruits contrast well with fall foliage and winter landscapes and persist longer than other crabs. Grows 20-25 feet tall. Photo Credit: Steve Foltz, Honey Tree Nursery, Prince Edward Island

Cherry, Sour 'Crimson Passion' (*Prunus cerasus*) is another dwarf sour cherry that is part of the Romace series, introduced by the University of Saskatchewan. Crimson Passion is a little smaller than Carmine Jewel, however, the fruit is twice as large and ripens about mid-August. Photo Credit: NDSU, Carrington Research Extension Center

Cherry, Sour 'Meteor' Genetic dwarf introduced by the Univ. of MN in 1952 with large, bright red fruit and yellow flesh. Mildly acid in flavor. Fine for sauces, pies, jellies and preserves. Blooms early May and ripens early July. Self-pollinating. Does well in all climates. Grows 10-14' tall. Photo Credit: Courtesy of Univ. of Minnesota

Linden, American 'Redmond' (*Tilia americana* 'Redmond') A great tree for street or lawns! Tight, pyramidal, upright form. Enormous, glossy green, heart shaped leaves with bright yellow fall color. Clusters of small, very fragrant flowers in summer produce rounded fruits. Prefers moist well-drained soil. Grows 40-60' tall with 25-30' spread. Photo Credit: Plant Perfect, Bismarck, ND

Linden, Hybrid 'Harvest Gold' (*Tilia x mongolica* 'Harvest Gold') 'Harvest Gold' Linden is an upright, oval hybrid which was developed in Manitoba, Canada. It is an open-pollinated seedling from Manchurian and Mongolian linden. Lovely exfoliating bark and glossy foliage changes to bright gold in the fall. Works well as a street tree and is resistant to sun scald and leaf spot. Grows 30-40' tall and 25-30' wide. Photo Credit: & USDA Plant Mat. Ctr., Jeffries Nursery

Linden, Little Leaf 'Greenspire' (*Tilia cordata* 'Greenspire') An upright oval shaped tree with an extremely straight trunk and central leader. Bark is cinnamon colored, with rich, leathery, dark green foliage which turns yellow in fall. Has small, fragrant, pale yellow flowers in mid summer. Greenspire is a fast growing, widely used street tree. Does well in difficult conditions. Grows 40-50' with 15-25' spread. Photo Credit: City of Fargo

Maple 'Sienna Glen' (*Acer x freemanii* 'Sienna Glen') A fast growing, hardy maple with uniform branching and pyramidal form. Dark green leaves and yellow-orange to orange-red fall color. Tolerant of alkaline, acidic and wet soil conditions. Superior to Autumn Blaze Maple in withstanding strong winds and winter hardiness. Selected in 1990 at Lake Elmo, Minnesota. Grows 60' tall with 20-25' spread. Photo Credit: Plant Perfect, Bismarck, ND
